PLAZA STONE CIRCLE (SPECIAL ORDER BLEND)

OLD TOWN BLEND (SPECIAL ORDER COLOR)

ECO-CITYLOCK® 5x10

Who says it has to be industrial-looking? Permeable pavers perform as structural pavement and can reduce or eliminate stormwater detention. These pavers provide 100% pervious surfaces that infiltrate, filter, and decrease stormwater runoff rates and pollutant loads. Permeable pavers increase site infiltration helping maintain pre-development runoff volumes, peak flows and time of concentration.

GRASSTONE™ II

Grasstone II is a versatile surface stabilization product used for both sloped and horizontal applications. The Grasstone II grid paver provides a sustainable solution to surface erosion, allowing infiltration of water and the ability to establish vegetation. Grasstone II reinforces grass areas by providing a concrete matrix support combined with topsoil and vegetative cover. This system can provide substantial pavement strength to minimize rutting and create a suitable platform for intermittent vehicular use. Grasstone II has been used extensively for vegetated fire lane pavements when designed and constructed according to conventional pavement design.

LIGHT BROWN

ADA Detectable Warning Paver

The ADA Detectable Warning Paver is an additional guidance provision for wheelchair and pedestrian access to streets, sidewalks and other components of the public right of way. This product will help ensure local jurisdictions and other entities that their facilities are accessible to people with physical or sensory disabilities. The ADA Detectable Warning Paver provides visual as well as textural contrast to conventional publicly utilized pavements.

BUFF/CHARCOAL

PLAZA STONE

Plaza Stone is a timeless paving stone with an impressionistic embossed surface profile. It creates a gentle and warm effect by combining soft curved edges with rectangular and square stones. Plaza Stone is available in many colors to accommodate the most discriminating tastes. Plaza Stone uses large-scale patterns to create interest and drama for commercial landscaping, while the stone's texture and pattern harmonize with surrounding buildings and site furnishings.

BUFF

REGAL STONE PRO[®] - Straight

The Regal Stone Pro - Straight takes retaining wall construction to a higher level. Architects, engineers, and contractors are choosing Regal Stone Pro to create flexible, cost-effective solutions for a broad range of large commercial, municipal, and residential retaining wall projects. With the rear lip design and a larger facial profile, construction, alignment, and setback are facilitated.

RUMBLESTONE® COLLECTION

Reminiscent of our fondest childhood toys, the innovative RumbleStone collection provides a set of rustic building blocks for your outdoor hardscape projects. Whether your project is simple or complex, large or small, RumbleStone's possibilities for creative expression are as limitless as your inner child's imagination. The seven tumbled RumbleStone sizes can be assembled in an endless variety of configurations and orientations. In addition to simple running bond patterns, the stones can be easily stacked with insets, moved forward and backward, horizontally and vertically, for more aesthetically pleasing visual relief and texture. What will you create?

ACCESSORIES

NATURAL LOOK SEALER – Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/steps

WET LOOK HIGH GLOSS SEALER – Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

POLYURETHANE CONSTRUCTION ADHESIVE – A high performance, construction grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, aluminum, steel, PVC, and tile.

Use For: Repairing broken concrete • Bonding retaining wall block and caps

POLYMERIC SAND - Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

Use For: Driveways • Sidewalks • Pool decks • Patios

BEFORE - NO SEALER

AFTER - WITH SEALER

COLOR VARIATIONS

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

THE NATURE OF EFFLORESCENCE

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
